###

*Steve Bullock is the Democratic Governor of Montana and the only presidential candidate who has won a Trump state. Even with a majority Republican legislature, Governor Bullock passed major progressive policies like expanding Medicaid, making record investments in education, and protecting our environment. Throughout his career, Bullock has fought against the toxic influence of money in politics, including the first challenge to Citizens United at the Supreme Court. As Governor, he passed some of the strongest campaign disclosure laws in the country. Montana's economy has strengthened under Bullock's leadership, with families climbing into the middle class at the fastest rate in the nation.*
